Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

This document outlines the brainstorming process for the project HealthAI – Intelligent Healthcare Assistant. This AI-powered assistant helps users by providing healthcare information, analyzing symptoms, and delivering personalized support.

Step 1: Team Gathering, Collaboration and Problem Statement

Problem Statement:

Many patients lack access to quick, intelligent, and personalized health support. HealthAI helps users get reliable healthcare information, symptom analysis, and recommendations through an AI-powered assistant.
